

Hot Tub Maintenance

It's important to note that the frequency of maintenance tasks may vary depending on the specific needs of your hot tub, so always refer to the manufacturer's recommendations and consult with a professional if needed.

Daily:

- Check the sanitizer level and adjust as needed
- Remove any debris from the water surface with a skimmer
- Make sure the water circulation system is running properly
- Check the temperature and adjust as needed

Weekly:

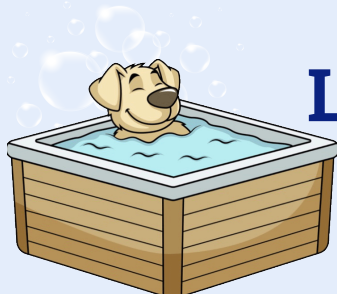

- Test and adjust the pH and total alkalinity levels
- Shock the water with a high dose of sanitizer
- Clean the filter(s) and replace if necessary
- Check the water level and add more if needed
- Clean the hot tub cover and rinse it with water

Monthly:

- Drain and refill the hot tub with fresh water
- Clean the hot tub shell with a non-abrasive cleaner
- Clean the jets and other parts of the hot tub with a specialized cleaner
- Inspect the hot tub for any signs of damage or wear and tear

Yearly:

- Have a professional inspect and service the hot tub's electrical and plumbing components
- Inspect and replace any damaged or worn parts, such as the cover or jets
