

How to Clean the Acrylic Shell of Your Hot Tub

Keeping your hot tub's acrylic shell clean is crucial for maintaining its beauty and longevity. This guide will walk you through step-by-step instructions for a sparkling clean hot tub.

Gather Your Supplies

- ☐ **Non-abrasive cleaner** (hot tub-safe or mild dish soap)
- ☐ **Soft microfiber cloths or sponges**
- ☐ **Bucket of warm water**
- ☐ **Vinegar solution** (optional for stubborn spots)
- ☐ **Hot tub vacuum** (optional for debris removal)
- ☐ **Protective gloves**

1. Drain the Hot Tub

- ☐ Before cleaning, completely drain the hot tub. Follow the manufacturer's guidelines or use the built-in drain valve.

 **Tip:** While the tub is draining, check for any debris or particles and remove them with a net or vacuum.

2. Wipe Down the Acrylic Shell

- ☐ **Wipe Down the Acrylic Shell**
- ☐ **Step 1:** Dampen your microfiber cloth or sponge with warm water.
- ☐ **Step 2:** Apply a small amount of non-abrasive cleaner to the cloth.
- ☐ **Step 3:** Gently scrub the shell in circular motions, paying extra attention to buildup or stains. Avoid using harsh chemicals or abrasive tools—they can damage the acrylic.

 **Note:** For stubborn spots, use a vinegar solution (1 part vinegar, 3 parts water). Apply and let it sit for a few minutes before wiping clean.

3. Rinse Thoroughly

- ☐ After cleaning, rinse the shell thoroughly with clean water. Make sure no cleaner residue remains, as it can affect the water chemistry when you refill the tub.

4. Dry the Shell

- ☐ Use a dry microfiber cloth to wipe down the shell. This prevents water spots and streaks, leaving your hot tub looking pristine.

5. Refill the Hot Tub

- ☐ Once the shell is clean and dry, refill your hot tub with water, ensuring it's at the correct level. Test the water balance with a hot tub test strip and adjust as needed.

Maintenance Tips

- ☐ **Clean monthly:** Regular cleaning prevents buildup and extends the life of your acrylic shell.
- ☐ **Cover care:** Wipe down your hot tub cover regularly to keep debris out of the water.
- ☐ **Avoid harsh chemicals:** Stick to hot tub-safe cleaning products for the best results.
